

MAKING OUR COMMUNITIES GREAT PLACES TO GROW UP AND GROW OLD

Tufts Health Plan Foundation collaborates with older adults, civic leaders and nonprofit organizations to build and support age-friendly communities. We are living our mission as a trusted community investor and leader in the movement to create communities that work for people of all ages.

HOW WE WORK

Changing demographics bring new opportunities.

New England is now, and will continue to be, older than the U.S. as a whole.

By 2030, more than one-quarter of New England residents will be 60 years or older.

By tapping into our ingenuity and leveraging the wisdom of older people, we can adjust systems and policies to make the most of this new reality.

OUR FORMULA FOR IMPACT

Our **VISION** is that all communities are vibrant and healthy because they view older adults as critical assets, reflect their voices in policies and promote integrated practices improving individual health and wellness.

Our community investments include:
